- ▶ - We are working since 1999 with the intensions to serve Indian textile industry and trade for ensuring their quality of final products made. Our products/services used by industry to assess the quality of the product at every stage of manufacturing.
- ▶ - Our mission is to empower research and innovation through precision and reliability.
- ▶ - We offer total quality solutions at every stage of Textile manufacturing-Raw Material /Work in process/Finished goods.

Benefits offered to customers

- ▶ Offer consultation to customers for choosing right instruments for their need.
- ▶ Timely delivery of product which are made with best raw material, best manufacturing technology with strict adherence to international standards like ASTM, BS, ISO etc. Our instruments are made for fault free running. All instruments are supplied with calibration certificates with traceability and are supplied with detailed user manuals.
- ▶ Installation, demonstration, Operator Training.
- ▶ Supply of quality consumables from AATCC / SDC / James heals / Test Fabrics etc.,
- ▶ Annual maintenance schemes/ instant repairs and prompt after sales service is provided to the customer
- ▶ All our Instruments comes with Calibration certificates traceable to NABL confirming Instruments are made as per International standards

Test Standards we follow in our products and Services

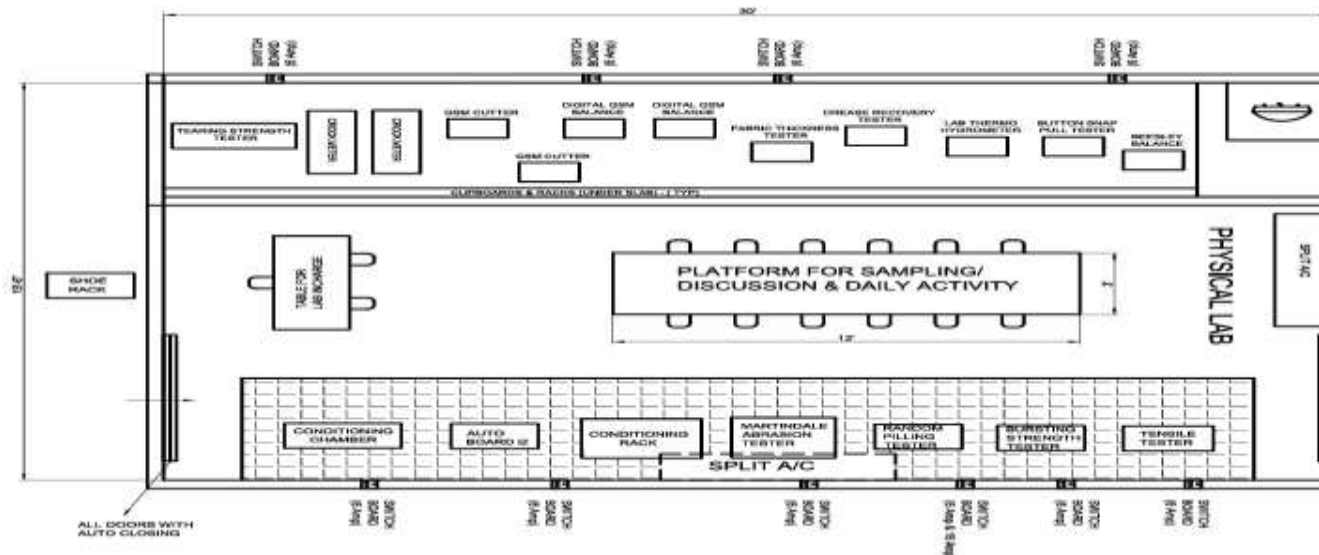

Test Standard Organization
per buyer SOP

As

Tailored Lab Layout Design Plans

- ▶ - We Provide Lab Layout and Design services including water and power requirements of each Instrument and their placement inside the lab
- ▶ - Fully customized lab layout designs to suit your specific needs.
- ▶ - Ensure efficient workflow and optimized space utilization.
- ▶ - Personalized attention to detail ensures every lab is unique and functional.

Lab Layout for Wondercraft

Certified Accuracy for Every Instrument

- ▶ - All instruments come with individual calibration/confirmation certificates.
- ▶ - Guarantees accuracy and compliance with industry tests standards.
- ▶ - Regular updates and periodical recalibration services available.
- ▶ - Confidence in precision and adherence to quality protocols.

Comprehensive User Manuals

- ▶ - Each instrument is accompanied by a detailed user manual and warranty certificate.
- ▶ - Includes setup instructions, operating procedures, and troubleshooting tips.
- ▶ - Accessible in multiple formats for ease of use.
- ▶ - Simplified operation ensures efficient use of every Instrument.

List of Symbols used in the Equipment (With Details)

Number	Symbol	Publication	Description
1		IEC 60417-1001	ON (Class Supply)
2		IEC 60417-1002	OFF (Class Supply)
3		IEC 60417-1003	Not intended for use
4		IEC 60417-1004	Residual (Voltage) Limited
5		IEC 60417-1005	Ready to touch contact
6		IEC 60417-1006	Direct Contact
7		IEC 60417-1007	Indirect Contact (Warning Voltage)
8		IEC 60417-1008	High Voltage Warning (Warning Voltage)
9		IEC 60417-1009	Warning Contact
10		IEC 60417-1010	Contact (Open State)
11		IEC 60417-1011	Contact (Warning IEC Risk Assess)
12		IEC 60417-1012	Hand (Warning IEC Risk Assess)
13		IEC 60417-1013	Hand (Warning IEC Risk Assess)
14		IEC 60417-1014	Hand (Warning IEC Risk Assess)
15		IEC 60417-1015	Hand (Warning IEC Risk Assess)
16		IEC 60417-1016	Hand (Warning IEC Risk Assess)
17		IEC 60417-1017	Hand (Warning IEC Risk Assess)
18		IEC 60417-1018	Hand (Warning IEC Risk Assess)
19		IEC 60417-1019	Hand (Warning IEC Risk Assess)
20		IEC 60417-1020	Hand (Warning IEC Risk Assess)
21		IEC 60417-1021	Hand (Warning IEC Risk Assess)
22		IEC 60417-1022	Hand (Warning IEC Risk Assess)
23		IEC 60417-1023	Hand (Warning IEC Risk Assess)
24		IEC 60417-1024	Hand (Warning IEC Risk Assess)
25		IEC 60417-1025	Hand (Warning IEC Risk Assess)
26		IEC 60417-1026	Hand (Warning IEC Risk Assess)
27		IEC 60417-1027	Hand (Warning IEC Risk Assess)
28		IEC 60417-1028	Hand (Warning IEC Risk Assess)
29		IEC 60417-1029	Hand (Warning IEC Risk Assess)
30		IEC 60417-1030	Hand (Warning IEC Risk Assess)
31		IEC 60417-1031	Hand (Warning IEC Risk Assess)
32		IEC 60417-1032	Hand (Warning IEC Risk Assess)
33		IEC 60417-1033	Hand (Warning IEC Risk Assess)
34		IEC 60417-1034	Hand (Warning IEC Risk Assess)
35		IEC 60417-1035	Hand (Warning IEC Risk Assess)
36		IEC 60417-1036	Hand (Warning IEC Risk Assess)
37		IEC 60417-1037	Hand (Warning IEC Risk Assess)
38		IEC 60417-1038	Hand (Warning IEC Risk Assess)
39		IEC 60417-1039	Hand (Warning IEC Risk Assess)
40		IEC 60417-1040	Hand (Warning IEC Risk Assess)

The table lists various safety symbols used in the equipment, including symbols for ON/OFF states, residual voltage, direct and indirect contact, warning voltages, and contact types. Each entry includes a number, a symbol image, the corresponding IEC publication number, and a brief description of the symbol's meaning.

Standard Operating Procedure

- ▶ - Standard operating procedure is provided for each instrument.
- ▶ - Operator can keep the copy of SOP Handy and refer during Instrument operation.
- ▶ - This ensures test is conducted as per International test standards.
- ▶ - Operating the Instrument as per SOP brings reliable and Consistent results

Dedicated Operating and Training Support

- ▶ - Hands-on training for your team to ensure smooth operation.
- ▶ - Each Instrument Supplied is installed, demonstrated and operator training is ensured in Real-time or Virtual support.
- ▶ - Operating of the Machine goes in Accordance with test Standards.
- ▶ - Empowering your staff with knowledge and confidence.

Specialised instruments for the Apparel Sector
 The apparel sector also benefits from Amith Garment Services' wide range of testing instruments including: Baller Ring Pull Tester, Bulker Impact Tester, Tumble Drum, Double Column Hardness, Heat Bond Strength Tester, Highspeed Initial Defecting (IL) Machine, Heat Seal Strength Gauge, primary force instruments.

Innovative Fabric Inspection Machines
 Amith Garment Services' advanced range of fabric inspection machines offers the highest level of accuracy. The machines measure the length of the fabric folds and it is also possible to control the packaging of the fabric from state to roll or end rolls. The third advantage is that the machine counts the number of defects in a fabric, advantage to be seen in a factory installed on the machine. These advantages reflect the company's dedication to delivering commercial solutions.

Amith Garment Services can also provide and also offer solutions for quality control and machine setting instruments which have been recommended by most buyers from Europe and US. The solutions offer wide range of adjustments from 100mm, 200mm, 300mm, 400mm and 500mm. Amith Garment Services also offer for fabric manufacturers an array from 100mm, 200mm, 300mm, 400mm and 500mm. Amith Garment Services also offer for fabric manufacturers an array from 100mm, 200mm, 300mm, 400mm and 500mm. Amith Garment Services also offer for fabric manufacturers an array from 100mm, 200mm, 300mm, 400mm and 500mm.

Enhanced Compliance with Certification
 To better buyer confidence, Amith Garment Services offers third party certified certification for all its instruments. These certifications, certified with European and US works are provided at no extra cost. This added assurance allows clients to utilize their equipment with greater trust, knowing they meet rigorous international standards.

Aditya Birla repeated the machine order to be based on the early supplied machine performance.
